SOFT SKILLS

Problem Solving | Team Work |
Time Management | Adaptability

INTERESTS

- Reading
- Fitness Enthusiast

CERTIFICATIONS

- Java
- Python
- Internet Of Things (Workshop)

Rutwik Kumbhar

Full Stack Web Developer

PROFESSIONAL SUMMARY

Experienced Full Stack Web Developer proficient in HTML5, CSS3, and JavaScript, with expertise in Angular, Core Java, Hibernate, and Spring Boot. Specialized in JEE, Web Services, and Rest API, combining Frontend and Backend skills to create scalable and responsive web applications.

PROJECTS

1. IntervuAi AI-Powered Interview Platform | | React | TypeScript | Redux | Tailwind CSS | Spring Boot | Spring Data JPA | MySQL

- Developed an AI-powered interview platform using React, TypeScript, Redux, and Tailwind CSS.
- Implemented JWT authentication for user login and signup functionality.
- Designed and created REST APIs using Spring Boot and Spring Data JPA for seamless integration with the frontend components.
- Integrated the OpenAI API to simulate realistic job interview scenarios and provide personalized feedback to enhance students' interview skills.
- Took on the role of project lead and ensured the successful completion of the project.

2. Tourista | |

HTML5 | CSS3 | JavaScript | Spring Boot | Spring Data JPA | MySQL

- Developed an Online Trip Management System using HTML5, CSS3, and JavaScript
- Implemented login and signup functionality for admins and users
- Created RESTful API for communication between the frontend and backend components
- Designed and developed a product add to cart page with sorting and filtering options

3. Employee Management System | |

Angular | Bootstrap | Spring Boot | Spring Data JPA | MySQL | Project Lombok

- Developed a web application using Angular, Bootstrap, Spring Boot, Spring Data JPA, and MySQL.
- Implemented CRUD operations for efficient personnel data management.
- Created features to create, update, delete, and view employee records.
- Streamlined data management with precision and efficiency.
